Prehistoric Life in the Mesozoic Era: “Age of the Dinosaur”

This virtual online course will review the 180 million “Age of the Dinosaur,” the Mesozoic Era. The Mesozoic Era is characterized by the evolution of many species and marked by two major extinction events at the beginning and end. Most notably, it is known for the period when dinosaurs reigned and dominated the planet.

In this class, we will investigate major plant and animal groups that emerged during the Mesozoic Era. Students will be able to:

- Identify and discuss the three major periods of the era
- Discuss the shifting of world climate, geography, and the effects on living species
- Identify various dinosaur species and other animal species and how they adapted to their environments

Join us for a great course!

Meet the Instructor

Jackie Gates is an animal lover and Behavior Analyst. From a young age, she has been enthralled with animals, studying various species and volunteering in her local animal shelter. In her free time, she enjoys playing with her two cats, Kyo Ren and Mowgli, and watching reality veterinarian shows such as Dr. Oakley, Yukon Vet and The Incredible Dr. Pol. Jackie has had many pets, including a dwarf hamster, betta fish, a dog, and five cats. She has enjoyed the fun times and love that come from domesticated animals and the wonders of learning about earth’s majestic wild creatures from all time periods.

PBS Adult Education classes are taught using various instructional methods tailored to the specific needs of adult learners. Students will be encouraged to develop critical thinking, research and study skills, and utilize technology for learning and collaboration. All students benefit from being engaged with interesting material and collaborating with other students.
